JUSTINIAN ERDMIER

MID-SR FULL STACK ENGINEER

Senior Full Stack Engineer with over 5 years of experience in C#/.NET, Blazor, and SQL Server, specialising in building scalable APIs and modernising legacy systems. Demonstrates strong ownership of end-to-end solutions, from architecture to deployment, with proven success in automation, performance optimisation, and cross-team collaboration. Brings a track record of delivering production-quality code, advancing engineering standards, and driving system reliability in remote Agile environments.

EMPLOYMENT HISTORY

JUL 2025 – JAN 2026

Software Engineer, OneMain Financial, Evansville, IN

- Engineered high-performance SQL solutions across Snowflake, SQL Server, and IBM Mainframe systems
- Automated data workflows by introducing .NET and C# for maintainable internal tools
- Delivered strategic data analysis and reports, improving decision-making for business and technical teams
- Strengthened data integrity by resolving systemic quality issues and implementing governance
- Modernised law-grid workflows by replacing manual processes with a custom web application

MAY 2023 – MAY 2025

Software Engineer, Work4ce & Toyota Manufacturing North America, Georgetown, KY

- Delivered scalable applications for manufacturing and operations, modernised legacy systems, and improved performance
- Led transition to Blazor, enhancing front-end capabilities and maintainability
- Introduced architectural improvements, code standards, and CQRS for better extensibility
- Reduced data-transfer times by leveraging IndexedDB for offline functionality
- Collaborated with cross-functional teams to align solutions with operational needs

OCT 2021 – JAN 2023

Software Engineer, Lieberman Technologies, Evansville, IN

- Rewrote legacy PHP codebase using a custom micro-framework, reducing technical debt and improving code quality
- Delivered in-house business app that increased lead-to-customer conversion by ~15%
- Reintroduced C#/.NET, expanding technology stack after a decade of PHP-centric focus
- Translated business requirements into well-architected software solutions
- Enhanced project clarity through structured plans and transparent documentation

INTERNSHIPS

AUG 2021 – OCT 2021

Software Developer Intern, Atlas Project, Eleven Fifty Academy, Indianapolis, IN

A post-graduation continuing-education programme providing advanced technical training and mentorship from leaders within Indiana’s technology community. The programme offered practical, production-focused engineering experience within an Agile team environment, emphasising modern development practices, collaborative design, and real-world delivery.

- Gained hands-on professional engineering experience working within an Agile team structure.
- Delivered RESTful APIs using C#, .NET Framework 4.8, Entity Framework 5, and MSSQL-backed architectures.
- Built a real-time messaging application using ASP.NET MVC.
- Contributed to system design and accessibility through database/API architecture planning and UI/UX collaboration.

EDUCATION

MAY 2021

Red Badge in Software Development, Eleven Fifty Academy, Indianapolis, IN

An immersive, industry-aligned software development programme built around real-world, project-based learning and over 500 hours of hands-on coding, debugging, and technical training. The curriculum covered all core programming fundamentals before progressing into a specialised focus on C#, ASP.NET, and the modern .NET ecosystem. Training included Agile methodology, collaborative development workflows, UI/UX fundamentals, and comprehensive instruction in SQL and relational database design.

Coursework: Software Development; Advanced Debugging Techniques; Database Design & Data Modelling; SQL & Relational Databases; Agile Practices; UI/UX Fundamentals; C#/.NET Development

AUG 2013 – MAY 2017

CORE 40 with Academic Honours, F.J. Reitz High School, Evansville, IN

A four-year academic honours diploma with advanced coursework across mathematics, world languages, and college-level/AP subjects. Completed the full mathematics curriculum offered by the school and studied two foreign languages concurrently. Earned 1st place in the Mathematics division of the 2016 Tri-State Science Fair and 1st place in the 2016 and 2017 World Languages Academic Super Bowl. Served as State Parliamentarian for the Indiana Junior Classical League and President of the F.J. Reitz JCL chapter. Co-founded and served as Parliamentarian for the Students of Reitz Humanist Society, a student-led organisation focused on community support.
